Step 2: ADD BRANDING COST

If you would like a logo printed on the product also click button

[Go To Printing & Branding](#)

The Branding costs will be automatically generated using the quantity you selected whilst in the previous screen.

You have the option to select the number of positions you would like the Logo design to appear.

To finalise this section you must click [Add To Quote](#)

This will return you to the previous field and your quote will be complete.

Please Note. Quotes generated on line will not include Freight or Artwork alteration charges.

Your Rocket Promoshop Sales Representative can advise you of additional artwork charges upon receiving your logo.

Acceptable Artwork Formats

Preferred Format is a compatible Illustrator .ai or .eps vector format. All artwork including fonts should be converted to outlines/vector curves -- this may be supplied from PC's as well as macs. If the file contains spot colours these should be identified as Pantone PMS swatches in the swatch palette.

The RocketPromoshop art studio is a Macintosh environment, so we always prefer files in a 'mac' format. We use EPS files for logos. If you are in a PC environment, there are programs that can convert a logo to an EPS format; such as Illustrator, Corel Draw & Freehand. Our main 'mac' programs are Adobe Illustrator CS (v11), Adobe Photoshop (5.5 & CS), Quark Xpress (4.1 & 6.5). Artwork will be accepted on Mac/PC CD, DVD or email in a 'Stuffit' mac 'Zip' format.

Electronic Logo Artwork should be emailed to sales@rocketpromoshop.com.au

Branding Options Available

Screen Printing

Used to print spot colour and 4 colour process on clothing & bags etc

Plastisol Printing

Plastisol transfers are used when fine detail is required on printing to material such as caps, clothing or bags.

Embroidery

Here the Logo or message is woven onto the cap, clothing or bag. Branding cost increases with 'stitch count' or size of Logo. The minimum text height for embroidery is 5mm.

Decal Printing

Used on coffee mugs and glassware. A spot colour or 4 colour process decal is pre-printed, then fired onto the coffee mug or glass. Costs are specified for one side (half wrap decal) or two sides (full wrap decal).

Offset Printing

1-4 colour process printing on mouse mats, plus traditional printing of brochures and point of sale.

Pad Printing

Utilises a custom made pad to print up to 7 spot colours on hard products such as golf balls and plastic or metal products such as calculators. With soft products such as stress toys, only one colour is possible because of the difficulty to register the printing.

Laser Engraving

Fine engraving of Logos into metal and some plastic products.
